CERA online maps

The CERA Map:

- The CERA Map is a 2013 GIS-based map of the Canterbury region.
- It maps the high level of damage to the region in the following areas of the map:
- In 2013, the map was updated to show the following information:
- Information about the status of buildings.
- Information about the status of roads.
- Information about the status of water supply.
- Information about the status of gas supply.
- Information about the status of electricity supply.
- Information about the status of sewerage supply.
- Information about the status of telecommunications supply.

Planning and Community Toolkit (PACT)

A multi-layered toolkit providing information on the status of the region. It provides a range of information including land use and zoning, transport routes, and other information to help you plan for the future.

The map is an interactive map and you can click on the map to see more information.

- PACT map areas in
- Canterbury region and
- Canterbury region and
- Canterbury region and

Christchurch Central - Akaaro Projects and Private Sector Progress

The map highlights the Christchurch Central Business District (CBD) and the surrounding area. It shows the progress of the reconstruction of the CBD and the surrounding area.

The map is an interactive map and you can click on the map to see more information.

Government ICT Strategy and Action Plan to 2017

June 2013

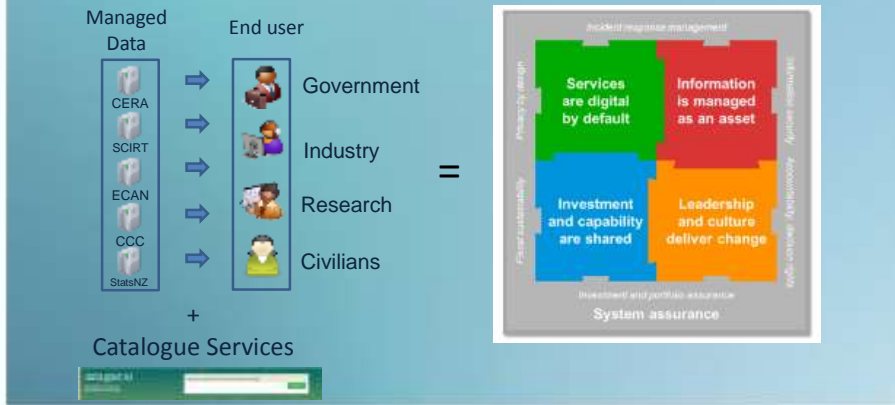

The *Strategy and Action Plan* seeks to:

- create effective and efficient integrated service delivery models
- realise new value from government information assets
- optimise the use of scarce resources and capabilities
- strengthen assurance systems to manage risk and quality
- deliver a migration path for aging legacy systems
- leverage scale and efficiencies
- partner with the private sector and non-governmental organisations
- increase the pace of change.

The *Strategy and Action Plan* seeks to:

- create effective and efficient integrated service delivery models
- realise new value from government information assets
- optimise the use of scarce resources and capabilities
- strengthen assurance systems to manage risk and quality
- deliver a migration path for aging legacy systems
- leverage scale and efficiencies
- partner with the private sector and non-governmental organisations
- increase the pace of change.

The Government ICT strategy is expressed in full and delivering value to New Zealand citizens
